uid terrasq; novas nunc Antipodasq; relectos
Miramur? tellus fixa diu jacuit:
Vt verò hanc movit summo Copernicus ausu,
Discretæ Oceano quæ latuere prius
Gentes inspectæ magno monstrante Columbo,
Vtrius ergo horum gloria major erit?

Aliud eiusdem argumenti

Adversas pedibus gentes reserando Columbus
Deportat magni nominis inde decus.
Hanc tibi sed propius divine Copernice famam
Deberi, doceo fors ratione mea.
Nam, tu dum terram varios provolvīs in Orbes,
Difficile haud fuerat Clima videre novum.
